

College Work-Study Calculator

The Work Study Calculator allows for supervisors and students to calculate the number of allowable hours that work-study students can work per week in order to utilize all of their work study funds during a set period of time. The calculator was built as an aid for student employees who hold only ONE position.

Award Amount:

Rate of Pay:

Number of Weeks:

Average hours per week available:

Total hours available to work:

Disclaimer:

Please Note: The work study calculator is only an estimate of your available hours to work. **Any changes made throughout the year to your award total, hourly rate, overtime rate, or other changes will affect your overall available hours to work.**

The work-study calculator utilizes the following formulas to determine the average number of hours per week the student can work by the following formula:

Work Study Award \$ ÷ Hourly Pay Rate = Total hours available to work.

Total hours available to work ÷ the # of weeks from the bi-weekly pay schedule = Average hours per week
